Trusted by fast-growing companies worldwide

## Postgres Database

Every project is a full Postgres database, the world's most trusted relational database.

- ✓ 100% portable
- ✓ Built-in Auth with RLS
- ✓ Easy to extend

## Authentication

Add user sign ups and logins, securing your data with Row Level Security.

## Edge Functions

Easily write custom code without deploying or scaling servers.

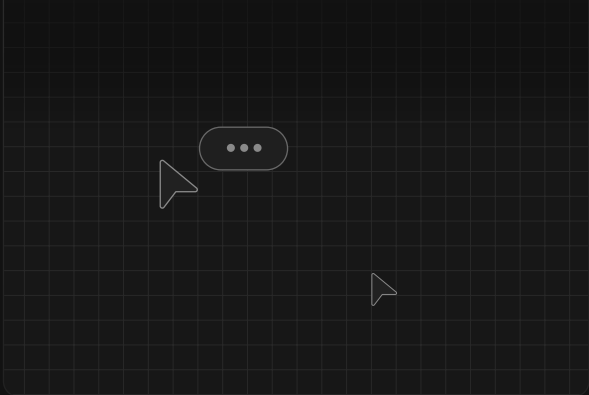

## Storage

Store, organize, and serve large files, from videos to images.

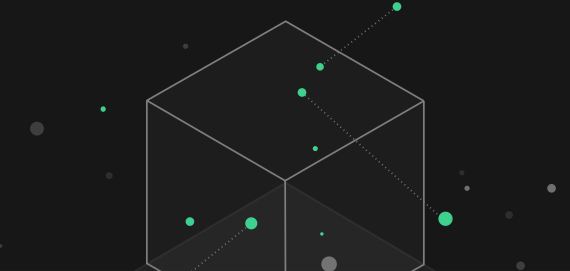

## Realtime

Build multiplayer experiences with real-time data synchronization.

## Vector

Integrate your favorite ML-models to store, index and search vector embeddings.

## Data APIs

Instant ready-to-use Restful APIs.

@thatguy\_tex

Working with @supabase has been one of the best dev experiences I've had lately. Incredibly easy to set up, great documentation, and so many fewer hoops to jump through than the competition. I definitely plan to use it on any and all future projects."

@KenTheRogers

"Holy crap. @supabase is absolutely incredible. Most elegant backend as a service I've ever used. This is a dream."

@PaoloRicciuti

"Using @supabase I'm really pleased on the power of postgres (and sql in general). Despite being a bit dubious about the whole backend as a service thing I have to say I am not disappointed by anything. The

@KennethCassel

"Badass! Supabase is amazing. It literally saves our small team a whole engineer's worth of work constantly. The founders and everyone I've chatted with at supabase are just awesome people as well :)"

@the\_BrianB

"Working with Supabase is just fun. It makes working with a DB so much easier."
